

PII TOOLS

Discover, analyze,
and de-risk
sensitive data
anywhere

5 reasons to start using PII Tools

What makes PII Tools the **best software solution** for the **discovery** and **remediation** of **personal and sensitive data**?

1

A 360° view into your entire environment at all times

Automatically cover all regulations and storages in one easy-to-use package

2

Fewer mistakes and less work for infosec, legal, and DPOs

Rely on the most accurate AI detections on the market

3

AI that covers all data at once, doing the work for you

Search through structured & unstructured, local, cloud, database & email, 400+ file formats, images, and archives

4

Quick response times preempt regulatory penalties

Confidently handle data subject access requests and audits

5

Affordable, upfront B2B pricing with zero surprises

Pay only for what you actually need

The Data Discovery Solution You Need

Audits & Compliance

CIO

CISO

CPO

DPO

Infosec

Legal Teams

Scan, assess risk, and remediate any sensitive data type (including PII, PCI, and PHI) across the entire digital inventory.

Breach Incident Management

Certified Auditors

Breach Response Teams

Identify affected people, emails, and files in minutes, using a secure, air-gapped installation of PII Tools.

Cloud Data Migration

CTO

CISO

IT

Consultants

Increase safety and reduce storage costs dramatically with a proper cleanup of your legacy inventory before migration.

Client Assessments

MSPs

Auditors

Consultants

Win more business during prospecting & consulting with modern AI software that uncovers your clients' high-risk data.

Harness the power of PII Tools

Discover

Scan your storages and reveal any personal or sensitive data.

Assess risk

Analyze discovered data based on its severity, content, and context.

Remediate

Report, delete, or quarantine suspicious personal information.

Comply

Keep up with regulations thanks to accurate scheduled scans.

“It only took 30 minutes to have PII Tools set up and running on Linux.”

Sean Pouler – DBA specialist at Woolworths

WOOLWORTHS

Precise reporting

PII analytics

Use PII Tools' interactive analytics to slice & dice your inventory, find high-risk records, or answer subject access requests.

Simplified compliance

Audit reports & Remediation actions help teams understand and mitigate the risk profile of your digital inventory, and make the right decisions quickly.

Risk classification

PII Tools performs an automatic risk classification (low, high, critical) for each scanned document.

Exact locations

Understand the exact location of every piece of PII in your inventory for surgically precise remediation, down to the very character and pixel level.

Precise reporting

Person Cards®

Automatically link up all of the data found on each individual.

This completely automatic aggregation applies to your whole inventory.

Let AI assign PII to each individual across all files, emails, DB records.

Export and share the rolled-up Person Cards as a simple spreadsheet.

Document Redaction

Surgical in-place redaction of sensitive data.

Redact commonly used file formats and storages, including PDF.

REST API is available for workflow automation.

Custom, configurable exclusions for redaction tasks.

Choose the right license for you

<h2>End-Business</h2> <p>Understand and de-risk your company data</p>	<h2>Consultant license</h2> <p>sub: for MSPs, auditors, QSAs, forensic teams</p>	<h2>Enterprise</h2> <p>For complex implementations</p>

Trust the companies that trust us

“A manual data review would take us years and years, which was not an option. PII Tools provides us with a full report wherever there is any PII on our Sharepoint, GSuite, Microsoft Exchange, Salesforce, and physical devices.”

Raul Diaz – Senior Director, IT

PII TOOLS

Do the right thing. It's easy with PII Tools.

"Our mission is to protect your reputation."

Radim Řehůřek, PhD
CTO & Founder
