PII TOOLS

Discover, analyze, and de-risk sensitive data anywhere

PII Tools is a product of RARE Technologies Ltd, providing industry excellence since 2012.

5 reasons to start using PII Tools

What makes PII Tools the **best software solution** for the **discovery** and **remediation** of **personal and sensitive data**?

1 A 360° view into your entire environment at all times
Automatically cover all regulations and storages in one easy-to-use package

2 Fewer mistakes and less work for infosec, legal, and DPOs
Rely on the most accurate AI detections on the market

3 AI that covers all data at once, doing the work for you
Search through structured & unstructured, local, cloud, database & email, 400+ file formats, images, and archives

**4** Quick response times preempt regulatory penalties
Confidently handle data subject access requests and audits

5 Affordable, upfront B2B pricing with zero surprises
Pay only for what you actually need

The Data Discovery Solution You Need

Audits & Compliance

CIO   CISO   CPO   DPO   Infosec   Legal Teams

Scan, assess risk, and remediate any sensitive data type (including PII, PCI, and PHI) across the entire digital inventory.

Breach Incident Management

Certified Auditors   Breach Response Teams

Identify affected people, emails, and files in minutes, using a secure, air-gapped installation of PII Tools.

Cloud Data Migration

CTO   CISO   IT   Consultants

Increase safety and reduce storage costs dramatically with a proper cleanup of your legacy inventory before migration.

Client Assessments

MSPs   Auditors   Consultants

Win more business during prospecting & consulting with modern AI software that uncovers your clients' high-risk data.

Harness the power of PII Tools

Discover
Scan your storages and reveal any personal or sensitive data.

Assess risk
Analyze discovered data based on its severity, content, and context.

Remediate
Report, delete, or quarantine suspicious personal information.

Comply
Keep up with regulations thanks to accurate scheduled scans.

"It only took 30 minutes to have PII Tools set up and running on Linux."

Sean Pouler *– DBA specialist at Woolworths*

WOOLWORTHS

Precise Reporting

PII analytics

Use PII Tools' interactive analytics to slice & dice your inventory, find high-risk records, or answer subject access requests.

Simplified compliance

Audit reports & Remediation actions help teams understand and mitigate the risk profile of your digital inventory, and make the right decisions quickly.

Risk classification

PII Tools performs an automatic risk classification (low, high, critical) for each scanned document.

Exact locations

Understand the exact location of every piece of PII in your inventory for surgically precise remediation, down to the very character and pixel level.
